

Creative Tots Kindergarten Prep

Designed for students who turn four by August 15th

Why Creative Tots?

As expectations are rising in early childhood education, we at Creative Tots are taking notice of these recent trends. We strive to achieve the best as we align our curriculum to incorporate these ideas for your child.

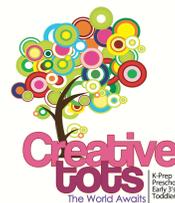

Our research-based curriculum provides age-appropriate, high-quality academics designed to exceed the standards. These are derived from the State of Ohio Content Standards for Early Childhood Education, which assures accountability for educational goals in the state of Ohio.

Our program focuses on solving problems, using language, developing new vocabulary and engaging in organized intellectual activities. We recognize and celebrate the developmental stages of children who will soon be entering into Kindergarten while maintaining the chosen milestones of each age group.

We also believe that along with the importance of academics we must also meet social, emotional and physical needs of the child as a whole. We are devoted to providing you and your child with a learning environment that will allow them to build lasting friendships, gain confidence in their abilities, as well as academic readiness for the future.

About Creative Tots K Prep Program

Creative Tots' 4-5 day K Prep program focuses on early reading lessons and reading strategies for your child. Research shows that ages 4, 5 and 6 are the crucial ages for children to master early reading. After the age of 6, children are playing "catch-up" to cement their literacy fundamentals. Creative Tots uses an early reading program that emphasizes specific reading strategies that will help your child to become a strong reader. The week's curriculum is structured around a five-day learning sequence. Day one focuses on introducing a new text and high-frequency site words that are critical for young readers to learn. Day two re-emphasizes comprehension and integrates the site words into individual writing activities. Day three rereads the text and creates individual sentences with the focus on what makes a sentence. Day four and five reviews text with focus on comprehension and word work. All of the week's lessons are also integrated into the home environment, encouraging families to work on practicing sight words and phonics in fun and meaningful ways. Mathematics and science are also an integral part of our k prep program. We focus on hands on experiences and activities to build the skills students need to be successful in future academic endeavors.

About Creative Tots Kindergarten Prep Enrichment Programs

In addition to the academic components of Creative Tots K-Prep programs, there are a number of exciting enrichment experiences that are provided to our students. These provide the opportunity for young learners to interact and appreciate the experiences within our community that exist between school and home. Children will explore the arts with special guests in music, yoga, art, and science classes. Field trips and guest speakers from the local area will be incorporated throughout the year.

Music class - Ms. Joanie will continue teaching with us as our music teacher. She has over twenty years of musical experience, with advanced training in guitar and voice. In addition, she has taught in New York City at the prestigious Calhoun School.

Art class- we will experience art class with various mediums and learn about fundamentals of art and its history. Children will be introduced to various artists and their famous works. In addition, this program will feature special visits from a local children's art teacher Ms. Penny (Classes are held throughout the school year).

Yoga- we will be engaging in yoga to discover and enhance their physical and social development using simple yoga techniques through music. Yoga benefits children in many ways including enhancing physical flexibility, refining balance and coordination, developing focus and concentration, and boosting overall self esteem and confidence (Classes are twice a month on Fridays).

Field Trips/Special guest presenters - Field Trips and special guest speakers from the local area are incorporated throughout the year. Offering these in a context meaningful to children develops a strong sense of self and a healthy respect for others and their community. Field trip locations may include Sunrock Farm and the Children's Theater, of Cincinnati. Special Guest presenters include the Program on Wheels group from the Children's Museum Center, Mad Scientists Group, and Local Fire Department.
