

Creative Tots Preschool Program

Designed for students who turn three by August 31st, 2017

Why Creative Tots?

As expectations are rising in early childhood education, we at Creative Tots are taking notice of these recent trends. We strive to achieve the best as we align our curriculum to incorporate these ideas for your child.

Our research-based curriculum provides age-appropriate, high-quality academics designed to exceed the standards. These are derived from the State of Ohio Content Standards for Early Childhood Education, which assures accountability for educational goals in the state of Ohio.

Our program focuses on solving problems, using language, developing new vocabulary and engaging in organized intellectual activities. We recognize and celebrate the developmental stages of preschool children while maintaining the chosen milestones of each age group. A detailed list of curriculum learning goals and objectives for the preschool program are available upon request. Please send inquiries to creativetotspreschool@gmail.com.

We also believe that along with the importance of academics we must also foster social/emotional growth and aid in the cultivation of independence of the child as a whole. We are devoted to providing you and your child with a learning environment that will allow them to build lasting friendships, gain confidence in their abilities, as well as academic readiness for the future. Classrooms are strengthened through combining children aged three to five in a group setting still allowing for age-appropriate small group activities. Students are encouraged to work and play comfortably among their individual levels of development while at the same time challenged to grow.

What is Unique about our Preschool Program?

Our goal at Creative Tots is to engage and educate your child. Every activity is an opportunity for young children to develop knowledge, skill and a positive attitude about learning. We implement a unique preschool curriculum carefully designed to balance the traditional and the innovative, prompting the enthusiasm necessary for your child to excel in the many years of school ahead. As much as it is true that we should not deny children the path to learning they seek through play, what develops their natural curiosities and interests is when they experience success, increase self-confidence and discover their strengths. Our curriculum is designed to strengthen your child in the areas of social-emotional behavior, physical development, mathematics, language arts, science and the fine arts.
